

DELL EMC @ HPC on Wall St

Ed Turkel

HPC Strategist
ed_turkel@delteam.com

The Dell EMC logo is located in the bottom right corner of the slide. It features the word "DELL" in a bold, sans-serif font with a stylized "E" that has a diagonal line through it, followed by "EMC" in a similar font. The background of the slide is a dark, high-angle photograph of a city skyline at night, with numerous skyscrapers illuminated by their lights, creating a bokeh effect in the foreground.

The future of AI is now

Why is AI so hot right now? A perfect storm that's driving demand among universities, enterprises, and startups.

AI Breakthroughs

We can now **train machines** to use data to sense, learn, reason, make predictions and evolve.

Computing Power

Hundreds of servers now power algorithms, processing in real time, facilitating quick identification of trends and patterns.

More Data

There is increased **data available to fuel AI** — with more being generated every second.

Machine / deep learning and AI use cases

 Media and Internet	 Medicine and healthcare	 Financial Services	 Media and entertainment	 Security and defense	 Autonomous vehicles
<p>Image/video classification</p> <p>Speech recognition</p> <p>Language translation</p> <p>Language processing</p> <p>Sentiment analysis</p>	<p>Cancer detection</p> <p>Diabetic grading</p> <p>Chronic illness prediction</p> <p>Drug discovery</p> <p>Gene mutation</p> <p>Aged care</p> <p>Sanitation</p>	<p>Fraud detection</p> <p>Risk assessment and compliance</p> <p>Claims processing</p> <p>Sales and Marketing</p> <p>Credit worthiness</p> <p>Algorithmic trading</p>	<p>Video captioning</p> <p>Content-based search</p> <p>Real time translation</p>	<p>Face recognition</p> <p>Video surveillance</p> <p>Cyber security</p> <p>Satellite imagery</p> <p>Event prediction</p> <p>Decision support</p>	<p>Pedestrian detection</p> <p>Lane tracking</p> <p>Traffic sign Recognition</p>

Barriers to capitalizing on AI

It takes too long to catalog data: Cataloging the very large data sets used in deep learning and machine learning requires tremendous amounts of computational power

It's hard to know where to start: In order to leverage AI technology, custom solutions built on new technologies and tuned systems are required

This is an evolving space: Nobody wants to invest in something today that will be out-of-date tomorrow

Dell EMC is at the forefront of AI

Acceleration

Servers + Storage + Networks are at the core of machine and deep learning solutions.

Expertise

The Dell EMC **HPC Innovation Lab** team stays on the cutting edge, helping customers keep pace with the constantly evolving landscape.

Evolution

Our solutions are based on a **scalable building block approach**, so the systems customers buy today can grow to meet their needs in the future.

Dell EMC has what you need to move forward

These reference solutions can be customized and tuned for specific workload needs

Configuration	Small	Medium - PCIe	Medium – SXM2	Large - PCIe	Large – SXM2
	Suited for use as a dedicated server to train models before deploying to production.	Suited for larger training jobs, with support for 4 GPUs.	Peer-to- peer interconnect between GPUs provides better training throughput	Suited for scaling out deep learning frameworks at a cluster level.	Peer-to- peer interconnect between GPUs provides better training throughput

Dell EMC machine learning professional services

Dell EMC understands that **deployment can represent a significant investment of time and resources**. That's why organizations of all sizes turn to Dell EMC and Dell EMC Partners to provide the services needed to succeed.

Dell EMC **Big Data Vision Workshops** are available to help you chart your course

Dell EMC **ProDeploy experts** have a proven track record of success in thousands of engagements worldwide.

Dell EMC **Remote HPC Cluster Management services** help keep machine learning and deep learning solution running smoothly with proactive monitoring and management.

Dell EMC **ProSupport** offers a single point of accountability, premium hardware and software support available 24x7 and next-business-day on-site service.

Protecting what's in your wallet

Business need

Turning 2.2B global cards
160M transactions/hour, 52B
transactions / year into
intelligence with 1.9M rules
applied to those transactions.

Solution

MasterCard worked with Dell and Cloudera to build a secure, PCI-certified Hadoop cluster. MasterCard's Enterprise Data Hub fully conforms to the PCI-DSS V 2.0 security standards so it can host PCI datasets and integrate with other systems.

Benefits

- Understand how, when and where customers buy leading to predictive analytics
- Increased security and fraud protection via analyzing customer purchasing patterns, affinities and rhythms using machine learning
- Expand business with anonymized data re: share of wallet compared to competition, average ticket and frequency to identify marketing opportunities and measure return on investment

“Data privacy and protection is a top priority for MasterCard. As we maximize the most advanced technologies from partners and vendors, they must meet the rigorous security standards we’ve set.”

Gary VonderHaar,
Chief Technology Officer, Architecture, MasterCard
